NOTE: If installing screen on a Chief J-series wall mount, proceed to Step 2 (J-Series VESA Interface Installation).

1. Using a 10-24 button head cap screw inserted from back side of bracket, secure mounting button, with chamfered hole of mounting button (larger surface) facing bracket, to top and bottom brackets (four places) (see Figure 2 & Figure 3).

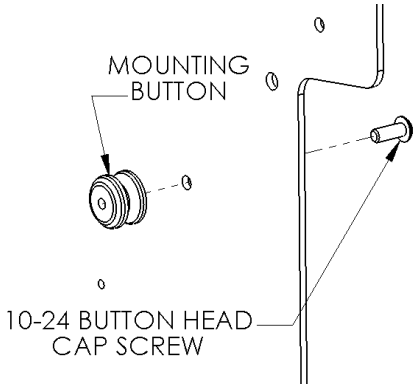

Figure 2

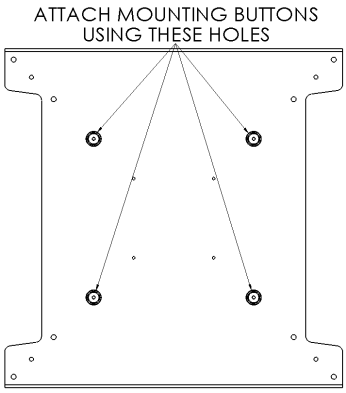

Figure 3

2. Place Nylon spacers over mounting holes on back of screen. Attach mounting brackets to display using the M6 screws (see Figure 4). For 32" and 37" screens use the longer spacer (20mm length) and M6 x 35mm screw (see Figure 5). For 42" 46" and 52" screens use the .375" spacer and M6 x 25mm Screws (see Figure 6).

3. With the aid of another person, lift your display up to the Chief Mount, aligning buttons of mounting brackets with slots in the Chief Mount. Lower safety latch on the Chief Mount to secure your display, making sure latch is completely engaged. **If using a Chief J-series wall mount,** use the M4 screws provided with the wall mount to attach the wall mount to the interface plate.
